

Isaac Jair Espinoza Ocampo

.NET Developer | Video Production & Editing

Summary

I am a .NET developer with 6+ years of experience building applications for both the public and private sectors. I currently work at the **Órgano de Administración Judicial** (Mexico's Judicial Administration Body, formerly the Federal Judiciary Council), where I design and maintain internal administrative systems built with **.NET Core, SQL Server, and REST APIs**, and produce and edit video with the **Adobe suite**.

I have also built solutions for e-commerce and insurance companies, implementing MVC architectures, client-side (jQuery) and server-side (C#) validation, and integrations with SOAP and REST services. I am passionate about continuous learning, process optimization, and writing clean, modular, and scalable code.

I also have solid frontend skills with **HTML, CSS, JavaScript, and Bootstrap**, and I adapt quickly to new challenges and technologies.

Technical Skills

- .NET Core / Framework (C#)
- SQL Server / LINQ / EF
- Elasticsearch
- HTML, CSS, JavaScript
- Bootstrap, AJAX, jQuery
- REST & SOAP APIs
- Git, Postman, Visual Studio
- AI-assisted development
- Adobe Creative Cloud (video)

Languages

Spanish: Native

English: Upper-intermediate (B2)

Professional profiles

GitHub | LinkedIn

Soft Skills

- Teamwork
- Effective communication
- Problem solving
- Adaptability
- Self-taught
- Organization and focus

Órgano de Administración Judicial

Judicial Administration Body, Mexico (formerly the Federal Judiciary Council)

.NET Developer & Video Producer | November 2023 – Present

- Built from scratch an **activity and event tracking system** with file uploads of any type, scheduling, progress charts, user login, and .NET Core APIs.
- Refactor and analyze legacy systems with **AI-assisted tools** to modernize and continuously improve them.
- Develop and maintain internal administrative systems with .NET Framework and .NET Core (C#).
- Built a full CRUD system on **Elasticsearch** as the primary data store, enabling fast full-text search.
- Integrate RESTful APIs to automate judicial procedures.
- Apply a layered architecture to ensure maintainability and scalability.
- Design complex SQL Server queries for strategic and operational reports.
- Implement stored procedures, functions, and triggers to manage critical data.
- Collaborate on functional analysis and UAT with multidisciplinary teams.
- Implement security validations and access control for sensitive data.
- Optimize internal processes by automating back-office tasks.
- Write technical and functional documentation for version control and auditing.

- Provide technical support to administrative users on new features.
- Produce and edit video content with the **Adobe** suite.

DIGIS01 Soluciones Digitales

.NET Developer | August 2020 – November 2023

- Developed an e-commerce platform with .NET Framework for product and sales management.
- Contributed to an insurance system built with .NET Core, integrating SOAP and REST services.
- Implemented the MVC pattern in web projects with HTML, CSS, JavaScript, and AJAX.
- Structured applications using a layered architecture to improve maintainability and scalability.
- Designed and modified database schemas in SQL Server.
- Created stored procedures for CRUD operations on products and users.
- Validated data on the server side with DataAnnotations in C#.
- Used Visual Studio scaffolding (EF database-first) to generate data models.
- Taught programming classes to technical staff and new hires.
- Led internal project teams, assigning tasks and providing technical supervision.
- Managed IT inventory to ensure equipment availability and control.

UNAM – General Directorate of Libraries

Social Service Internship | October 2019 – March 2020

- Created and updated institutional web portals with **Joomla** and **HTML**.
- Remotely installed **ALEPH v21 and v23** library management software.
- Helped maintain systems written in **Java**.
- Performed basic data management in **MariaDB** to query and update records.
- Provided technical support to administrative staff on using digital search tools.

Education

Bachelor's Degree in Informatics

Universidad Latina (UNILA)

2016 – 2020

English Language Program

Quick Learning

2024 – Present

Certifications & Courses

- Scrum Master – Udemy
- Server Administration – Capacítate para el Empleo
- Database Administration – Capacítate para el Empleo
- Phonetic Clinic 1 – Quick Learning
- Adult Learning – Capacítate para el Empleo
- Microsoft Learn – Development with .NET, Blazor, and Azure (2023–2024)
- Cloud Computing and Azure Architecture Fundamentals
