

Isaac Jair Espinoza Ocampo

.NET Developer

Summary

I am a .NET developer with 6+ years of experience building applications for the public and private sectors with **.NET Core, C#, SQL Server, Elasticsearch, and REST APIs**. At Mexico's Judicial Administration Body (**Órgano de Administración Judicial**, formerly the Federal Judiciary Council), I built from scratch an activity tracking system used by 100+ people and modernized legacy systems with AI-assisted tools. I am currently building an **AI agent integrated with Microsoft 365** to organize my team's work.

I have also built solutions for e-commerce and insurance companies, implementing MVC architectures, client-side (jQuery) and server-side (C#) validation, and integrations with SOAP and REST services. I am passionate about continuous learning, process optimization, and writing clean, modular, and scalable code.

I also produce and edit video with the **Adobe** suite, which helps me communicate technical ideas clearly, and I have solid frontend skills with **HTML, CSS, JavaScript, and Bootstrap**.

Mexico City, Mexico

Technical Skills

- .NET Core / Framework (C#)
- SQL Server / LINQ / EF
- Elasticsearch
- HTML, CSS, JavaScript
- Bootstrap, AJAX, jQuery
- REST & SOAP APIs
- Git, Postman, Visual Studio
- Generative AI: Claude, Gemini, Copilot
- Microsoft 365
- Adobe Premiere Pro, Audition, Photoshop, Illustrator

Languages

Spanish: Native

English: Upper-intermediate (B2)

GitHub | LinkedIn

Soft Skills

- Teamwork
- Effective communication
- Problem solving
- Adaptability
- Self-taught
- Organization and focus

Órgano de Administración Judicial

Judicial Administration Body, Mexico (formerly the Federal Judiciary Council)

Video Production & AI Development | January 2026 – Present

- Building an **AI agent** (chatbot) integrated with **Microsoft 365** that surfaces pending items and logs my team's tasks and activities, using generative AI tools (Claude, Gemini, and Copilot).
- Produce and edit institutional videos (courses, interviews, events, and announcements) with **Adobe Premiere Pro, Audition, Photoshop, Illustrator, and Media Encoder**.

.NET Developer | November 2023 – December 2025

- Designed and built from scratch an **activity and event tracking system** used by 100+ people: .NET Core REST APIs, user login, scheduling, file uploads, and progress dashboards.
- Built web registration forms for courses, events, and exams.
- Refactored and analyzed legacy systems with **AI-assisted tools** to modernize and continuously improve them.

- Built a CRUD module on **Elasticsearch** with full-text search.
- Integrated RESTful APIs to automate judicial procedures and reduce manual data entry.
- Maintained and evolved administrative systems in .NET Framework and .NET Core with a layered architecture, security validations, and access control for sensitive data.
- Designed complex queries, stored procedures, functions, and triggers in **SQL Server** for strategic reports and critical data control.
- Took part in functional analysis, UAT, and technical documentation with multidisciplinary teams.

DIGIS01 Soluciones Digitales

.NET Developer | August 2020 – November 2023

- Developed an **e-commerce** platform in .NET Framework (MVC) for product and sales management.
- Contributed to an **insurance** system in .NET Core, integrating SOAP and REST services.
- Designed database schemas and stored procedures in SQL Server for product and user operations.
- Structured applications in a layered architecture with client-side (jQuery) and server-side (DataAnnotations) validation.
- **Led internal project teams**, assigning tasks and providing technical supervision.
- **Trained** technical staff and new hires in programming.

UNAM – General Directorate of Libraries

Social Service Internship | October 2019 – March 2020

- Built and updated institutional web portals with **Joomla** and **HTML**.
- Remotely installed and configured **ALEPH v21 and v23** (library management) and managed records in **MariaDB**.
- Helped maintain **Java** systems and provided technical support to staff.

Education

Bachelor's Degree in Informatics

Universidad Latina (UNILA)

2016 – 2020

English Language Program

Quick Learning

2024 – Present

Certifications & Courses

- Scrum Master – Udemy
- Server Administration – Capacítate para el Empleo
- Database Administration – Capacítate para el Empleo
- Phonetic Clinic 1 – Quick Learning
- Adult Learning – Capacítate para el Empleo
- Microsoft Learn – Development with .NET, Blazor, and Azure (2023–2024)
- Cloud Computing and Azure Architecture Fundamentals
